EDUCATION

Western University – Ivey Business School

London, ON

Software Engineering & Honours Business Administration Candidate, Dual Degree

Expected Graduation: April 2028

- **GPA:** 3.9/4.0
- **Activities:** Men's Varsity Curling Team (First String) and Under-20 Ontario Men's Curling Team
- **Awards:** OUA Academic Achievement Award (2025), **U SPORTS Academic All-Canadian (2025)**, Dean's Honour List (2025), Scholarship of Distinction (\$3,500), Ontario Winter Games (Mixed Doubles)–Silver Medal

EXPERIENCE

Software Engineer Intern

Toronto, ON

Aureon Stocks

June 2025 – Aug 2025

- **Engineered backend systems** in Python to process financial sentiment data from Reddit and Twitter
- Integrated Ollama-based NLP models to summarize insights and generate community-driven sentiment scores that feed the user relevant post and a score out of 10, improving investment decision tools
- **Optimized SQL database queries by 15%**, increasing data retrieval efficiency and data management
- Conducted iterative experimentation with AI models to evaluate approaches for generating financial insights

LEADERSHIP

Aquatic Supervisor

Toronto, ON

Bayview Golf and Country Club

May 2022 – Present

- **Promoted twice** over five summers from Lifeguard & Swim Instructor to Deck Supervisor to Aquatic Supervisor based on leadership and performance.
- Lead the daily operations of the aquatic facility, supervising a team of **12 lifeguards** while ensuring compliance with safety standards and emergency procedures.
- Conduct interviews, create staff schedules, onboard and train new employees, and mentor staff to maintain high operational performance.
- Plan and coordinate aquatic programming and major club events, collaborating with multiple departments to deliver a positive member experience.
- Resole staff conflicts and member concerns through effective communication and problem solving while fostering a collaborative team environment.

PROJECTS

Deep Sea Explorer

Western Engineering Competition (Software Design)

- Designed and built an interactive simulation game using real-world ocean datasets
- Implemented state management and algorithmic decision-making to model pressure, temperature, hunger, and environmental hazards
- Applied the engineering design process from ideation to final presentation in a team of four
- Tech: *JavaScript, HTML/CSS, JSON, Simulation Programming, Git/GitHub*

Time-Travel Game Development (Unity Team Project)

Software Construction

- Designed and implemented a multi-level 3D Unity game in a team of 6, applying object-oriented architecture (GameManager, Level hierarchy, Enemy systems) to support scalable gameplay and progression systems.
- Developed core gameplay systems including enemy AI (state-based behavior), timer-based mechanics, puzzle logic, and player abilities, integrating features such as stealth, parkour, and combat across multiple environments.
- Collaborated using Git-based version control and debugging workflows to resolve integration issues, test gameplay features, and deliver a fully playable game with level progression, win/lose conditions, and UI systems.
- Tech: *Unity, C#, Object-Oriented Design, Git, Debugging & Testing Tools, Game Development, Team Collaboration*

SKILLS & INTERESTS

Languages: Python, Java, JavaScript, SQL, HTML5, CSS3, C#

Frameworks: React, Node.js, Next.js, Unity

Data & AI: NLP, Machine Learning Algorithms, Web Scraping, Ollama, JSON Parsing

Tools: Visual Studio Code, **Supabase**, IntelliJ IDEA, Git, GitHub, Scene Builder, Excel

Interests: Under 20 Men's Ontario Competitive Curling, Pickleball, Golf, Tennis, Swimming, Fitness, Formula 1
