EDUCATION

Western University – Ivey Business School (GPA 3.9)

London, ON

Software Engineering & Honours Business Administration Candidate, Dual Degree

Expected Graduation: April 2028

- Relevant Coursework: Data Structures & Algorithms, Object-Oriented Design, Software Construction, Software Design, Calculus 3, Linear Algebra, Probability & Statistics
- Self-Directed Study: MIT OpenCourseWare – Topics in Mathematics with Applications in Finance
- **Activities:** Men's Varsity Curling Team (First String) and Western Pickleball Club
- **Awards:** VHA Head Start Scholarship (2026), **U SPORTS Academic All-Canadian (2025)**, Dean's Honour List (2025, 2026), Scholarship of Distinction (\$3,500), Ontario Winter Games (Mixed Doubles)–Silver Medal (2024)

PROFESSIONAL AND LEADERSHIP EXPERIENCE

Aquatic Supervisor – Bayview Golf and Country Club

Thornhill, ON (May 2022 – Present)

- **Earned two promotions** over five summers—from Lifeguard & Swim Instructor to Deck Supervisor to Aquatic Supervisor—through consistent operational performance, safety leadership, and team development.
- Lead a team of 12 associates through daily operations, including safety protocol enforcement, emergency preparedness, member service, and cross-functional coordination with F&B, kitchen, tennis, golf, and membership departments across a 4-month peak season.
- Redesigned the Aquatic Supervisor role by integrating administrative responsibilities with visible on-deck presence – leading from the floor rather than the office. The change eliminated member complaints about supervisor visibility and improved team compliance and engagement without requiring formal policy changes.
- Planned and executed Canada Day programming for 100+ members, coordinating logistics, staffing, and cross-departmental programming; members told the club it was the strongest Canada Day the facility had run.
- Restructured weekly staff scheduling to reduce coverage gaps and shift-swap friction; conducted structured interviews, hired 3 of 5 applicants, and delivered onboarding training to the full team.

Assistant Coach – Ontario Curling Council, Trillium Camp

Waterloo, ON (August 2025)

- Selected as assistant coach for a 96-athlete elite development camp, working directly with 16 competitive curlers including athletes with Olympic-level experience.
- Co-developed individualized training plans in the weeks leading up to camp, adapting drills and progressions across skill levels to prepare athletes for high-intensity competitive practice.

PROJECTS

Fraud Detection Classifier

Independent Project (Python, XGBoost, scikit-learn, SMOTE)

- Built a fraud detection classifier on a highly imbalanced credit card transaction dataset (284,807 transactions, ~0.17% fraud rate), implementing and comparing class-weighted Logistic Regression and XGBoost models with optional SMOTE-based resampling.
- Achieved a Precision-Recall AUC of 0.861 with 0.849 recall and 0.636 precision at the tuned classification threshold on the strongest predictive model.
- Applied threshold optimization and cost-sensitive evaluation to balance false positives (customer friction) against missed fraud (business loss) - a real compliance and risk management trade-off for transaction monitoring systems.

Kraft Heinz Equity Research Memo

Independent Project (Financial Analysis, Valuation, Peer Comparison)

- Published an equity research memo on Kraft Heinz (KHC) covering business overview, thesis development, peer multiple valuation, and DCF cross-check; arrived at a Hold recommendation with a \$25 target price.
- Analyzed segment-level performance across North America, International Developed Markets, and Emerging Markets, identifying volume/mix trends as the key debate for the stock.
- Published memo publicly on LinkedIn.

SKILLS & INTERESTS

Operating & Leadership: Team Leadership, Coaching & Mentoring, Continuous Improvement, Process Improvement, Root Cause Analysis, Cross-Functional Coordination, Standard Work, Safety Protocols, Conflict Resolution

Data & Analytics: Python, SQL, XGBoost, scikit-learn, pandas, Machine Learning, Financial Analysis, Excel

Additional Languages & Tools: Java, JavaScript, HTML5, CSS3, C#, Git, GitHub, VS Code, IntelliJ IDEA

Interests: Competitive Curling (Under-20 Ontario, Western Varsity First String), Weightlifting, Formula 1 (technical & team dynamics), Fitness, International Travel
